

Adpulp.com is the inside-the-industry publication,
produced by and for advertising professionals.

➤ Since the site's inception in 2004, Adpulp.com has consistently attracted many of the industry's best and brightest.

➤ When you run a production company, a photo studio, a print shop, a design shop, a talent firm, a catering company, a sound studio, an editing house, a car service, or another company that serves the needs of people working in the agency business, we are here for you. We'll gladly work with you to craft your message for our audience.

What Our Readers Say

➤ "The writing is conversational and no B.S., which we appreciate, but even more, we value that AdPulp's writers heap praise when appropriate, but aren't too scared to question or criticize work and industry practices."

-- Say Daily

➤ "Its pages are full of creative inspiration and thoughtful articles on the societal impact of modern advertising."

-- Kate Novatska

Sponsored Content, Plus

- Paid placements are labeled, “Sponsored Content” and bylines (for your team member or company name) are included.
- Unlike a traditional ad buy, these articles live forever in the Adpulp.com archive, with links back to your site.

Small Investment, Big Return

- Adpulp.com sponsors pay \$500 for the placement of one feature article, which will live on the homepage of the site for approximately two weeks.
- When you purchase four or more paid placements, the cost drops to \$400 per article.
- We will also support your campaign with a banner ad on the sidebar, promotion via Adpulp.com’s social media channels, and a “live read” on Ad Chatter, our new podcast.

- For exact pricing, timing, and customization of your ad buy, please contact **David Burn** at dburn@adpulp.com.
- All insert orders are pre-paid in full via PayPal or credit card before the article(s) run.
